

Sage 50

Powerful accounting for true business control

Sage 50 is a powerful accounting system designed to meet the needs of medium and growing Irish businesses. It is designed to streamline all your accounting routines, reduce data entry and save you time. The program integrates seamlessly with other Sage products, as well as with Microsoft Office software, and is already relied upon by thousands of Irish companies.

Key features include:

- VIES reporting functionality in adherence with legislation requirements for businesses trading services within the EU
- Caters for all your accounting needs, from VAT returns to credit control
- Provides instant management information and accurate reports
- Includes stock control, cost centres or departments and budget capabilities
- Provides comprehensive data storage and full security
- Allows more than one person to work on the system at once
- Process maps and dashboards for improved ease of use
- Integration with Sage Pay card payment processing
- View and edit your data on your BlackBerry® or iPhone with Sage 50 Mobile

Sage 50 Accounts

Sage 50 Accounts has the tools you need to balance your books and manage your VAT. In addition, when the growth of your business demands more active control over your cash flow and expenditure, sophisticated features like Credit Control, Management Analysis Reporting, Refund and Discount Management, Profit and Loss by Departments and Multi Company will help you to accommodate these changes.

Sage 50 Accounts Plus

Sage 50 Accounts Plus has additional functionality, such as Price list by Customers, Project Costing and Stock Management to ensure optimum control over your business. The Asset Management system ensures up to date accounts, saving time and reducing the risk of error.

Sage 50 Accounts Professional

Extend your key business process with Sage 50 Accounts Professional. Customer and Supplier Management offer tighter control over stock through Sales & Purchase Order Processing, while complete foreign trade capability assists you in expanding your business outside of Ireland. With Advanced Budget Management functionality, you will be able to detect areas in your business with poor performance and take the necessary corrective actions.
