

MANAGED ANTI-SPAM

Compuland

"Effective IT Solutions"

Key Features

Enterprise Class Solution

Encompassing more than just anti-spam, this solution also provides anti-virus protection

No Email Delays

In stream filtering means all email is scanned in real-time while other solutions save the email first and then scan it which takes too much time

Simple Configuration

Flexible configuration options allow you to determine what constitutes spam. Personalized white lists, blacklists and rules can be set up and changed via a web interface

Comprehensive Reporting

A wide range of detailed reports provide you visibility of the volume of email and type of threats so you can see your business is being constantly protected

Scans Outbound Emails

An optional add-on is for outbound emails to be checked against known phishing sites to protect your business user from inadvertently propagating a virus or replying to a malicious email

Threats facing SMBs today:

- Email Spam
- Malware
- Email worms
- Network viruses
- Spyware
- Data theft
- Phishing attacks

*80% of all e-mail traffic is Spam.
The number one vector for virus
delivery to the desktop is e-mail.*

Reducing the Cost of Defense for Your Business

Think Spam is just a nuisance? It's also the most effective way to transmit a virus!

The volume of spam being sent today is astounding. In the tens of trillions of emails per year. Junk filters do a good job, but by then it could already be too late. Compuland believes it's better to stop that email from ever reaching your network, because the best way to fix a problem is to stop the problem from ever happening. Once the unwanted email gets to your network, all it takes is one careless click and your business could be compromised.

For less than a cup of coffee, Compuland Managed Anti-spam service prevents all unwanted email, spam and viruses from ever reaching your network. Giving your business the continual protection needed to stay on top of this ever present and evolving threat.

Benefits of a Managed Anti-virus solution

- **Increase Productivity and Reduce Operating Costs at the Same Time!**
If every employee used only 5 minutes a day deleting unwanted e-mails, how much time would your organization waste in a month? Think about the total cost associated to that wasted time. Take your time back and save your company money!
- **Fully Managed Solution for Less Than Any Competitive Offering**
We understand the overhead and threat spam creates for your business and users. Let someone who knows what they are doing setup and manage your email perimeter for you. You will not find a more cost effective per mailbox solution.
- **Protect Your Company's Critical Assets and Information**
Stop email threats before they ever get to your network.
- **A Flexible Solution**
We can set up your various email filters, or if you prefer, you can have control over what gets through and what is spam. We offer the appropriate security for any size of company and network. And setting it up takes minutes.
- **Comprehensive Reporting**
Regular reports identify the volume and types of email being filtered, giving you the benefit of seeing where email is coming from and how many threats you have avoided. It is satisfying to know that you are safe!

Device Lifecycle Management

Spam, once onto the desktop, leaves your entire business at the mercy of the employee doing the right thing.

Why Our Clients Choose Our Managed Anti-spam Solution

Other Anti-spam Software:

- Store and forward introduces delays in delivery of emails
- Only filters inbound emails not outbound which could cause your company to be blacklisted
- Only quarantines email on a group basis not on an individual employee basis
- Complex and expensive licensing models

Managed Anti-spam:

- No delay in email delivery, scans in real-time
- Stores received email should your email server go offline
- Applies filters to all outbound email to prevent your users from sending on malicious email
- Priced per mailbox
- Managed by experts
